## CREATIVE EVENT

We here are Football Crazy people and we'll make sure you become one too. If you happen to be a football fanatic just like us, you'll be happy, really happy. Fighting over exactly what to give you in the theme, we couldn't come up with any conclusion on any club/player due to different loyalties of CORE members towards their club. As such we decided not to give you anything related to the very famous English Premier League. I know, it's a bit too sad, but that's the way it is. But, we had to relate the theme in any way possible to the EPL. **As such, the theme for you all is to make a compilation on the very football famous striker Thierry Henry.** He currently plays for FC Barcelona, but is famously known for his exploits with Arsenal, incase anyone didn't know.

Please check you have a folder 'Creative Event' on the desktop, which contains Pictures, Songs and Videos. The Video folder should contain three folders, 'Compilations', 'Goals' and 'Skills'.

PS - Videos in the compilation folder should not be used directly. You can use the stuff from it but not just copy/paste it directly. It's just for your reference.

We have provided you with decent amount of songs, which also shouldn't be used directly. You need to remix/synchronize it with other songs using the given software. Points would be deducted if you have used any song directly in the compilation, however you can use just a single song, remix it and then use it in the compilation. However due to time constraints, if you aren't able to mix the songs, you CAN directly use a song in the compilation, about which you can ask the organizers.

The compilation should be a minimum of 3 minutes and should be saved after rendering on the desktop by your school name ONLY.

We'll basically evaluate you on the following stuff -

- Creativity
- Synchronizing
- Song Mixing/Editing
- Video Effects/FX
- Overall Appeal

Video - 60% weightage. Audio - 40% weightage

Oh and don't worry, it's not too much we are asking you for, the duration for the event is enough of what we want for you.
